Senior Full Stack Engineer

Full Stack Engineer with 10+ years of experience designing, developing, and optimizing **full-featured web applications**. Specialized in modern JavaScript frameworks (**React, Vue, Angular**) for building interactive, user-centric **frontends**, and proficient in **backend** development with **Node.js, Python, and Java**, including RESTful APIs, database integration, and microservices architectures

Core Skills

JavaScript (React.js, Next.js, Vue.js, Angular), TypeScript, HTML5, CSS3, TailwindCSS, DaisyUI, Storybook, API Integration, Node.js, Python (Django, FastAPI), PHP (Laravel, Yii), Java

Additional Skills

Git, MongoDB, PostgreSQL, SQL, AWS (ECS, Lambda, RDS, S3), Jenkins, GitHub Actions, Webpack, Docker, Microservices, RESTful APIs, GraphQL, OAuth/JWT Authentication, Azure, Google Cloud, Blockchain Integrations (Solidity, Hyperledger),

Professional Experience

Senior Full-Stack Engineer | LimeSurvey | Hamburg, Germany (Remote)

June. 2023 ~ Aug. 2025

- Contributed to LimeSurvey's open-source full-stack platform, focusing on both backend (**PHP Yii** framework) and frontend (**React, Storybook**) development.
- Developed and maintained dynamic user interfaces in React, enhancing survey creation, response tracking, and data visualization for users.
- Optimized backend integrations and frontend data handling for complex survey logic, reducing load times and improving user interaction.
- Led the implementation of **Storybook** for UI component development, improving collaboration between frontend and backend teams.
- Ensured seamless user experience by collaborating closely with frontend and backend teams for real-time survey data reporting and export features.

Senior Frontend Engineer | GiftCash | Ancaster, Ontario, Canada (Remote)

Jan. 2022 ~ May. 2023

- Contributed to the development of GiftCash's web platform by building and maintaining backend systems using **PHP (Laravel)** and creating interactive user interfaces with **React.js**.
- Worked on the integration of secure payment systems, optimizing backend API performance to ensure efficient processing of gift card transactions and seamless user experience.
- Collaborated with the team to modularize and scale frontend components, improving application performance and enhancing the overall customer journey on the platform.

Full-Stack Engineer | Keeper Memorials | Jamaica, NY, USA (Remote)

Dec. 2020 ~ Jan. 2022

- Developed and enhanced a user-friendly memorial platform using **Next.js** and **TypeScript**, enabling families to build rich, interactive memorial pages with photos, videos and tributes.
- Implemented accessible, theme-customizable UI components using **Chakra UI** to reflect diverse memorial themes while maintaining usability for older/less-tech-savvy users.
- Enabled server-side rendering, optimized for **SEO** and performance so memorial pages load quickly and are easily discoverable.
- Worked closely with backend and design teams to integrate APIs for media uploads, digital guestbooks, map/locator features and kiosk displays for cemeteries.
- Ensured the platform adhered to high standards of security, data privacy and performance in a sensitive domain of digital memorialization.

Junior Full-Stack Developer | The Track APP | New York, USA (Remote)

Apr. 2018 ~ Nov. 2020

- Engineered a cross-platform calendar application using **Electron** and **React**, focusing on performance optimization and user experience.
- Developed features for efficient event creation, scheduling, and real-time updates, ensuring seamless synchronization across platforms.
- Collaborated with the team to design an intuitive user interface, enhancing usability and accessibility for end-users.

Education

Manila Central University

Bachelor of Computer Science | Aug 2013 – May 2017
